Production Analyser

Production Analyser is a powerful tool to store and analyse the production rate.

The unit can count number of objects / length and store in memory. It can store production done every hour in memory which can be noted at the end of the day.

Unit is a like a combined unit of Counter + Totaliser + Rate Indicator + Memory storage and all this in a compact size of 96 x 96 DIN

F E A T U R E S

- Six digit Counter with programmable multiplying / dividing constant.
- Rate indicator to show production per hour or production per minute.
- Time totaliser to indicate how long the machine has been running upto 9999.59 hours.
- Production data storage. Production in last eight hours / 24 hours is stored in memory.
- Battery back up for storage in case of power failure.
- Decimal point display user selectable in format XXXXXX or XXXXX.X or XXXX.XX.
- External enable input for starting counter and time totaliser.
- Option to start time totaliser operation only when external pulses for counting are coming.(Factory set).
- Pulse input from Proximity sensor or potential free contact.
- Production rate display selectable as production per minute or production per hour.
- All this in compact size of 96 x 96 x 150 mm.

O P T I O N A L   F E A T U R E S

- Connectivity to Production / Andon Displays
- PC Software 'Production Meter' to capture data on PC and generate reports
- Multiple units can be connected to single PC- Shift wise / date to date reports
- Possible to export data to ERP Software for further analysis
