

SE

Hydraulic Hollow / Solid & Paving Block Making Machine

BAR CUTTING MACHINE

FEATURES

SAFETY PLATE

- Ensures that cut pieces do not fly haywire hitting the operator.

Benefit : Increases safety of the operator.

DUAL OPERATION

- Dual operation by foot and hand.

Benefit : Increases productivity and efficiency of operator.

PROTECTION FOR V BELTS AND FLYWHEEL

- Against damages by all -weather conditions resulting in absolute safety in operation of machines

Benefit : Increases safety of machine

FLYWHEEL DYNAMICALLY BALANCED

- Proper torque is generated by consistent R.P.M. longer life for motor as fluctuation is taken care of.

Benefit : Spare parts & Electrical Components consumption Reduces.

SPECIAL HARDENED PLATE BEHIND CUTTING BLADE

- Supports the blades and does not allow the gap to be created between body and the blade.

Benefit : Increases higher tonnage Processing of steel.

SPECIAL HARDENING PLATE FOR GUIDING STEEL RODS

- Minimizes friction between bar and body which lengthens life of the machines.

Benefit : Minimised corrosion of Body as and when for Cutting / shearing of steel rods leading to longer life of machine.

SKG - CUTTING MACHINE
