# Rubber Processing Machinery

# RUBBER MIXING MILL

Homogenous composition of rubber with other ingredients to desired specification is a basic need for Rubber Industry and 'MODERN' Rubber Mixing Mill serves the purpose more effectively and efficiently.

Salient Features of 'MODERN' Rubber Mixing Mill:

- Heavy Duty with Rigid Alignment
- Drives of Renowned Make
- Chilled C.I. Hollow Rolls
- Precision Machined & Hob Milled Bull & Side Gears
- Safety through E.M. Brake or Auto-Reversable Control Panel

*The machines are manufactured and supplied in the range as tabled below:*

Type	Dimensions (Chilled Roll)				Drive	Batch Capacity
	Dia		Barrel Length		Electric Motor	
	Inches	mm	Inches	mm	H.P.	
MMM-1	10	254	24	610	15	10
MMM-2	12	305	30	760	25	20
MMM-3	14	355	36	915	40	30
MMM-4	16	<b>406</b>	42	1066	60	40
MMM-5	22	559	60	1524	<b>120</b>	100
LABOR/ TORYM DDEL :						
MML-1	6	152	13	330	7.5	2
