HYDRAULIC PRESSES

The application of Hydraulics in Rubber Processing through Hydraulic Presses is most convenient and effective method 'MODERN' Upstroking, Hot Platen Hydraulic Presses serve the purpose more efficiently and conveniently.

The table below indicates specifications for standard and frequently sold MODERN Hydraulic Presses (electrically or steam heated) :

Series	Hot Platen Size in cm	Capacity in Tonnes	RAM Dia in mm
MMH-1	30x30	40	150
MMH-2	40x40	65	200
MMH-3	50x50	100	250
MMH-4	60x60	150	300
MMH-5	70x70	200	350
MMH-6	80x80	260	400
MMH-7	90x90	330	450
MMH-8	100x100	410	500
MMH-9	120x1200	590	600

In all the serie : Working Pressure -210 kgs/cm²
: Stroke - 400mm
: Daylight Nos.- 3-4

Presses for Precured Tread Rubber, Vee Belts, Conveyor Belt Making, Flap Moulding and such other special purpose Hydraulic Presses are within the range of manufacture for which 'MODERN' are well-known. Details available against enquiry.
