

Mezzanine Floor and Lofts

The installation of mezzanine floor provides the solution for the optimum use of space. The useful area of the premises can be doubled for the use as a storage or work area, offices etc. By using the height of the building it is possible to utilise more space effectively. It is quick simple and clean construction, it has got great variety of dimensions, types of floors, building system etc., allow the system to be adapted to the precise needs of each client.
