

Mobile Racking

It offers you the ultimate in mobile storage system with the latest easy- glide technology for a smooth operation for years which is secure and cost effective. It can save upto 60% of floor space compared with conventional static shelving or increase storage capacity by almost 100%. The system glides on steel tracks and consist of mobile base units onto which different shelving options can be assembled. When a particular rack is required, the appropriate aisle is opened up by mechanical or electrically driven bases. Only one aisle is required to service a number of racks
