

We are manufacturers of rail clamps ranging from 30lbs to 120CR. We have supplied to leading crane manufacturers in India as well as to the steel plants. We are by far the best rail clamp manufacturer in India.

Salient features:

1. The hole center position is maintained taking into consideration the required clamping force
2. The front rod is knurled for better gripping to the rail.
3. Angular cut at the front of the plate to match the profile of the Rail.
4. Accuracy in Bending and Piercing operation thus giving a symmetric design.
5. Clamps are electroplated and are hence non-corrosive and has longer life.
6. CR 120 clamps are forged to provide greater strength.

Largest manufacturer of rail clamp it ranges from 30lbs to 120CR. We are supplying rail clamp to most of the leading crane manufactures in India as well as to steel plants. We are the most trusted or we can say by far the best Rail clamp manufacturer in India.

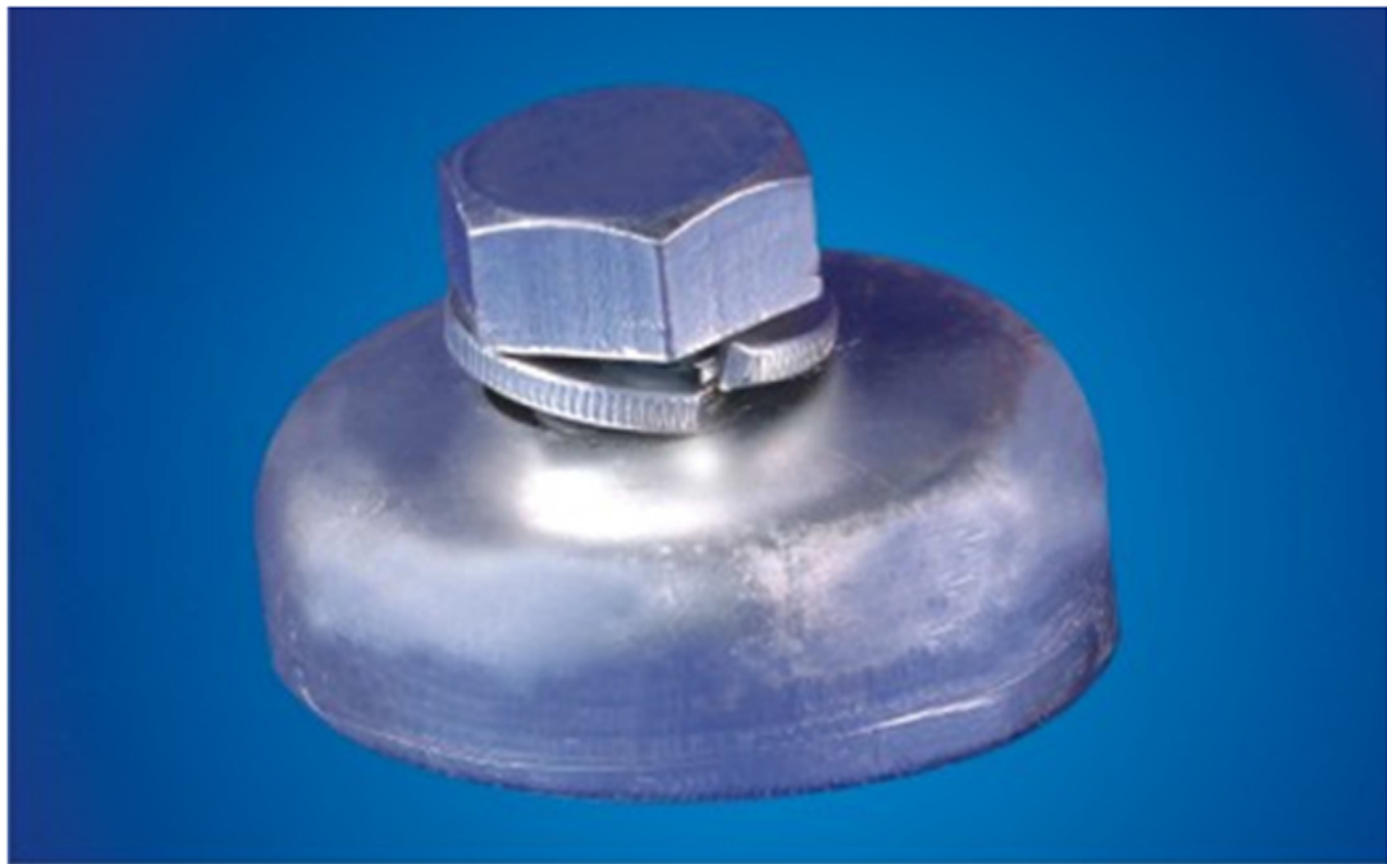

- Clamps gets Electroplated to give non-corrosive action and hence it increases its life to greater extent.
- CR 120 clamps are forged to give greater strength.
- The hole center position is maintained taking into consideration the required clamping force.
- Angular cut at the front of the plate to match the profile of the Rail.
- Front rod is knurled to provide better gripping to the Rail.
- Accuracy in Bending is provided and Piercing operation is done to give symmetric design.
