

Construction Fibre And Chemical

Construction Fibre and Chemical are reinforcing materials that are used to increase strength of the construction in a variety of applications. The Construction Fibre and Chemical act as secondary reinforcement in concrete which arrest cracks, increase resistance to impact or abrasion and improve quality of construction. The Fibre and Chemical are suitable for application in walls, foundations, tanks, roads etc. Tushar Steel is manufacturing Construction Fibre and Chemical.

Salient features of the Construction Fibre and Chemical:

Reinforcing material which is used to increase strength in a variety of applications
Acts as secondary reinforcement in concrete which arrests cracks
Increases resistance to impact/ abrasion
Improves quality of construction

Applications of the Construction Fibre and Chemical:

Walls
Foundations
Tanks
Roads
Blocks
Pipes
Tiles
Manhole covers
