

Computerized Wheel Balancer

Model : Smart Balancer - Computerized (008)

Our range of computerized wheel balancer is widely appreciated for the following attributes:

- Computerized video graphic wheel balancing machine
- Suitable for Car & LCV wheels
- Two modes of measurement: fine & normal
- Digital data setting "+" & "-" keys
- Five modes of alloy wheel function
- Single spine low RPM balancing technology
- Automatic positioning for weight installation
- Self calibration using master weight
- Self diagnostic / pedal brake
- Alloy / mag wheel balancing
- Maximum power requirement: W600
- Power supply: 220/240 v single phase
- Rim diameter: from 10" to 24"
- Rim width: from 1.5" to 20"
- Resolution: fine/normal 1 gms, 5 gms
- Motor: 33 HP I - Phase
- Approx. weight: 165 kgs
- Dimensions with wheel guard
- W x L x H = 1350 mm. X 1220 mm. X 1710 mm

We undertake calibration & maintenance of any make of digital automatic tyre inflator / air gauges.

Due to continuous engineering improvements, specifications are subject to change. Pictures shown in this folder are representative and not the entire range..
