

## ADULT HEALTH SCALE

### PERSONAL/ADULT SCALE (DIGITAL BEAM SCALE)

Citizen's HCB-200 Series digital beam scale is ideally suited for various professional markets (which include medical and fitness), and remains the perfect replacement for the old mechanical balance beam scale. The incredibly durable, yet portable, and is equipped with casters for easy mobility. The HCB-200H also features a mechanical height rod, allowing patients height to be taken the same time as weight. The portability and modularity really separate the HCB-200H, and give healthcare professionals a much better option than standard beam scales. The HCB-200H represents a true professional grade scale for years of uninterrupted operation.

Dual range personal scales are designed for weighing patients in medical environment.

Scales equipped with height meter, can also measure the height of weighed patients up to 2 meters. Personal Scales are equipped with backlit LCD/LED measuring Indicator, powered either from main or from batteries.

Personal Scales can be manufactured in two solutions :

- With height meter (indicator installed on a pillar), HCB 200H,
- Without height meter (indicator installed to the weighing platform, HCB200
